

HORADAM[®] watercolours: Transparent iron oxides

We added three transparent iron oxides to the HORADAM[®] watercolour range. Iron oxides are extremely lightfast, inorganic pigments. These three colours **Transparent ochre**, **Transparent Sienna** and **Transparent umber** form a transparent alternative to our more opaque colours **Yellow ochre**, **Burnt Sienna** and **Burnt UMBER**.

You will recognize the transparent colours by the unfilled square symbol.

Opaque colours have a filled square symbol.

And these are the symbols for semi-transparent colours and semi-opaque colours.

With these transparent colours you have a lot of creative possibilities, not only for transparent painting techniques, but also for mixing transparent colours.
