

Transparent Primer (50 516)

Schmincke **Transparent Primer** (50 516) is a transparent alternative for the Schmincke **Pastel primer** (50 503). **Transparent Primer** is less rough so that not as many pastel layers can be applied as when painting on Schmincke **Pastel primer**. After drying you can work with pastels and also with acrylic, gouache and oil colours on transparent primer. However, this primer does not adhere perfectly on other primers so that we do not recommend it for mixing techniques with water-colours.

Left: pastel, middle: water-colours, right: Gouache colours on transparent primer

Advice: **Transparent Primer** can be tinted with Schmincke acrylic colours. Please mix colour and primer carefully before applying it. There is almost no colour shift, so that you can obtain very dark or even black primers.

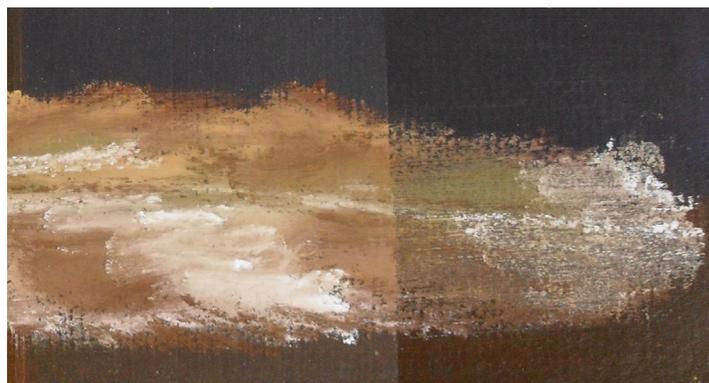

Further to this, you can add pastel effect on your acrylic painting after having primed this twice with **transparent primer**.

For fixing the pastel painting, we recommend the Schmincke **Pastel fixative** (50 402) or the Schmincke **Universal fixative** (50 401).

Video clip: please visit our website www.schmincke.de / Schmincke Media. There you can watch a step-by-step video about the use of transparent primer.

Properties: Transparent, lightfast and age-resistant primer with slightly absorbent character and slightly rough surface. The elastic film dries transparent and water-resistant. For various use on grease-free surfaces such as paper (min. 300 g/m²), wood, canvas or metal.

Application: **Transparent Primer** is ready for use, may also be diluted with water (max.10%) and should be applied 2-4 times with a brush or paint roller depending on the surface. Let each layer dry before applying the next layer. Working tools should be cleaned with water directly after use.
