

50 093 dammar in pieces

product name:

- Dammar in pieces.

contains:

- Natural dammar resin.

basic information:

- Natural Palembang-dammar of best quality; ideal for producing your own oil mediums, tempera emulsions and varnishes.

characteristics:

- Very light.

handling:

- *Dammar in pieces* is soluble in *oil of turpentine 50024 / 50102* or *turpentine substitute 50019*.
- For a **standard dammar solution** please mix 1 part of *dammar in pieces* with 3 parts of a solvent mentioned above (per weight). Our recommendation: Pour in the mixture of product and solvent in a clean, sealable container, e.g. in a glass bottle, and put/lay this down so that the product surface is maximum for a better solubility. Solving the resin takes a little time: As a guide for a total amount of 400 g *dammar solution* you should calculate about 6 hours. To accelerate the process it is helpful to shake the content of the container in between for several short times. (Important: The process should be done at room temperature – the resin solution should not be heated!)
- Please clean tools as soon as possible with *turpentine substitute 50019*, *oil of turpentine 50024 / 50102* or *brush cleaner 50051 / 50052*.
- A dried *dammar solution* remains soluble in *oil of turpentine 50024 / 50102*, *turpentine substitute 50019* or *varnish remover 50060* over a long period.
- Close immediately after use.
- Store in a cool and dry place.
- Individual pre-tests are required (see footer).

product labeling:

- Please refer to the individual safety data sheet on our website www.schmincke.de.
