

50 588 Acrylic varnish, matt

product name:

- Acrylic varnish, matt.

contains:

- Acrylic resin, matting agent, mineral spirit.

basic information:

- Final varnish for paintings in acrylics based on a high-quality synthetic resin.

characteristics:

- Matt
- colourless and elastic
- non-yellowing and age-resistant
- fast drying.

handling:

- Shake well before use.
- The product is ready to use, but can be diluted with e.g. *turpentine substitute 50019*.
- May only be applied to the layer of acrylic paint after it has dried completely at room temperature with a suitable varnish brush. This can normally be done after 72 hours with thinly applied acrylic colours; for those applied with a more paste-like consistency, it is better to wait one or two weeks before applying varnish.
- Please clean tools like brushes or palettes as soon as possible with e.g. *turpentine substitute 50 019* or *brush cleaner 50051 / 50052*.
- The dried varnish layer remains soluble in *turpentine substitute 50019* or *varnish remover 50060* over a long period.
- The varnish coats normally used in practice give no special UV protection to the paints used! For this reason, we recommend that you use high-quality and lightfast paints from the outset as far as possible.
- Close immediately after use.
- Store in a cool and dry place.
- Individual pre-tests are required (see footer).

product labeling:

- Please refer to the individual safety data sheet on our website www.schmincke.de
